Start preparing your city for the safe deployment of PMRs

THE CHALLENGE:

Municipal and regional governments, along with public facility operators are, or soon will be, faced with choices about how and when to permit innovations like mobile robots to be used for maintenance, security, delivery and other tasks in public spaces. The rise of public-area mobile robots (PMRs) coincides with the growing popularity of cycling and micromobility devices like e-scooters. These mobility devices compete for space and use common infrastructure (pathways, sidewalks, curbs, intersections). Planners must address issues such as bylaws, certification, licensing, rules-of-the-road, enforcement, orchestration, and monetization.

JOIN URF TO GET PREPARED

If PMRs are to operate at scale in public spaces, there are numerous governance concerns that must be understood and addressed consistently. Membership in URF can help you get up to speed quickly and help shape the evolution of this technology.

As an international subject matter expert, URF helps you anticipate how the technology, deployment and regulation of PMRs will impact urban spaces and people.

MUNICIPALITY/REGIONAL GOVERNMENT & PUBLIC FACILITY OPERATORS

Annual Membership Rates:

Population <1M	US \$1,000
1M to < 4M	US \$3,000
4M to < 10M	US \$5,000
Population >10M	US \$10,000

URBAN & TRAFFIC PLANNERS
\$2500+/year

RESEARCHERS
US \$500/year

ACCESSIBILITY ADVOCATES
Free Membership

BENEFITS OF MEMBERSHIP

Network & Problem Solve:

- Participate in Zoom calls with global network of members, supporters and subject-matter experts
- URF has active partnerships with:
 - Intelligent Community Forum
 - Robotics Australia Group
 - Drive Sweden
 - Centre for Integrated Transportation & Mobility

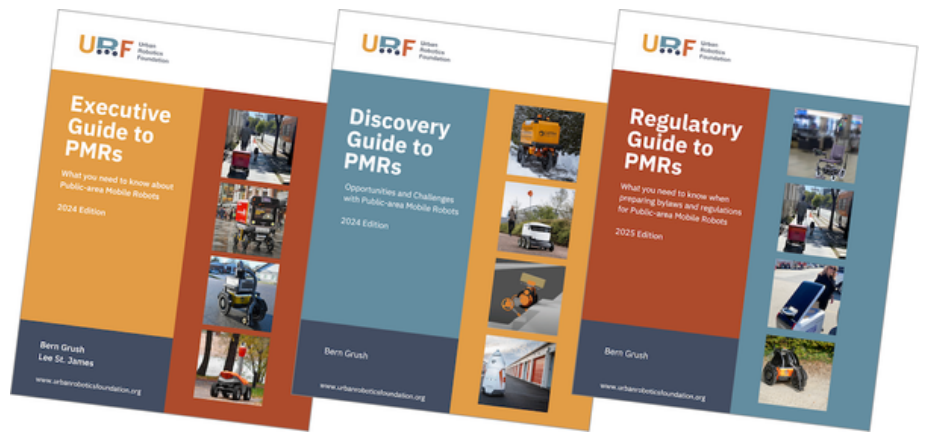

Priority Access:

- Member-only online resource library
- Early access to publications, engaging in pilot projects and sharing of key learnings.

Shape ISO-4448:

- View, debate and contribute to the new open international PMR deployment standard ISO-4448

Receive member discounts on publications, workshops and advisory services provided by URF and our affiliate partners.

Here are some of the many companies and individuals who have supported our work from the beginning and some who have joined us more recently on this exciting journey.
