

THE CHALLENGE:

If you work for a municipal government, urban or traffic planning consultancy or an accessibility advocacy group that is likely to be impacted by public mobile robots (PMRs) – you may struggle to find the most relevant and credible information to help you investigate the issues and plan a response.

BE READY WITH THE RIGHT QUESTIONS:

As an international subject matter expert, URF helps you anticipate how the technology, deployment and regulation of PMRs will impact your city and its people.

Join URF to learn the pros/cons and have a say in the international standards (ISO) intended to guide safe PMR integration into cities that want them.

MUNICIPAL/GOVERNMENT

URBAN/TRAFFIC PLANNERS

ROBOT MANUFACTURERS

ACCESSIBILITY ADVOCATES

RESEARCHERS/JOURNALISTS

FLEET OPERATORS

Please fill in the membership contact form on our website indicating the type of membership you are interested in.

BENEFITS OF MEMBERSHIP

Anticipate the impact of PMRs

Get access to the best information to guide investigation and decision-making

- Participate in strategic conversations tailored to needs of member organizations
- Engage in Strategic Roundtables to network and problem solve with other expert stakeholders
- Monitor global news and commentary about PMR deployment in exclusive bi-monthly newsletters
- Access member-only workshops, webinars and our online resource library.

Shape international standards

- View, debate and contribute to the draft ISO standard 4448 for PMRs
- Attend members roundtables (Zoom) to connect with other members and their point of view
- Download ISO 4448 working drafts and submit comments
